to me ▾

Dear Jane,

I hope you are well.

As you may be aware the Environment Agency has been investigating the viability of a flood alleviation scheme in Wendlebury.

Our contractors have done detailed research and determined that an engineered solution is not viable. However, property level protection may prove to be a viable option. We are looking at if and how this can best be delivered. Cherwell District Council have also been informed of this.

We will keep you informed.

Please feel free to contact me if you have any questions.

Betony
